

## ADD VALUE AND SPACE TO YOUR LANDSCAPE

Are you looking for an innovative solution to your deck dilemma? Make use of the space below your second-story deck with UnderDeck. An all-weather UnderDeck transforms the underside of new and old decks into clean, dry, bright spaces perfect for:

- outdoor retreats
- dry storage
- screened enclosures
- and more

MADE UNDERDECK ONE OF  
THE TOP 100 PRODUCTS**

## HOW IT WORKS

UnderDeck attaches to the underside of elevated decks, creating a durable, maintenance-free ceiling drainage system. Water flows through overhead deck boards to a series of collector panels and joist gutters that direct water away from the dry, livable space below. When it is time for deck repairs or cleaning, UnderDeck components are easy to remove.

 The pro series offers a distinct linear look with a slight radius on the lower edge of the joist gutter.

Choose from space-brightening white or tan. Visit [UnderDeck.com](http://UnderDeck.com) for more pictures or call 877-805-7156 to ask us about special orders.

## GETTING STARTED

Visit [UnderDeck.com](http://UnderDeck.com) for a complete set of tools for estimating and designing architecturally appealing outdoor spaces. You'll find an interactive calculator to generate fast, easy and accurate estimates. And, our worksheets will guide you through placing a detailed materials order.

## WARRANTY

UnderDeck's tough-construction components make it easy to install with confidence. Homeowners receive a 15-year warranty on defects. See complete warranty details at [UnderDeck.com](http://UnderDeck.com).

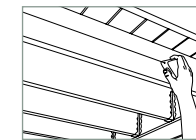

## CUSTOMIZABLE INSTALLATION

Innovative, all-weather, easy-to-install components make UnderDeck perfect for homeowners with new or existing decks.

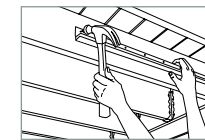

Design custom spaces that leverage the flexibility of UnderDeck by including:

- lights
- fans
- swings
- hanging plants
- audio/video system
- screened-in patios

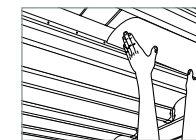

UnderDeck components fit virtually any deck with standard sizes that accommodate 12, 16 and 24 inch on-center joist spacing. They can be easily trimmed to accommodate unique openings or angled corners.

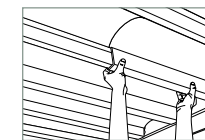

**1. SET PITCH LINE AND POSITION JOIST RAILS**

**2. LOCATE AND ATTACH JOIST RAILS**

**3. INSTALL COLLECTOR PANELS**

**4. ATTACH JOIST AND BOUNDARY GUTTERS**
